SITUATION SUMMARY

Cal OES SOUTHERN REGION

Virulent Newcastle Disease (VND) in backyard poultry and avian in Los Angeles, San Bernardino, and [Riverside Counties](#)

The California Department of Food and Agriculture (CDFA) has detected virulent Newcastle Disease (VND) in chickens in Los Angeles and San Bernardino Counties.

- On 05/16/18, CDFA detected VND in a small flock of backyard exhibition chickens in Los Angeles County, and confirmed on 05/17/18 by the United States Department of Agriculture's (USDA) Animal and Plant Health Inspection Service (APHIS).
- [On 06/27/18, CDFA detected VND in backyard exhibition chickens in Riverside county and was confirmed on 06/30/18 by USDA APHIS.](#)
- CDFA is the state lead on the incident, with support from Cal OES and in collaboration with USDA.
- USDA Incident Management Teams (IMTs) continue to rotate every two weeks to facilitate the management and support the response to the incident. The Gold IMT transition into a two week rotation beginning 07/01/18.
- CDFA confirmed there are no commercial premises currently involved and there is no public health risk due to this virus. Commercial surveillance actively continue to work with commercial premises in the surveillance zones on biosecurity to help protect their poultry from VND.
- USDA IMT is working with commercial poultry premises to encourage submission of samples for VND surveillance testing, facilitate the development of Secure Food Supply Plans, and assist with the issuance of permits to move materials on and off commercial premises within established control areas.
- Backyard Surveillance (education and outreach) continues in the surveillance zones.
- CDFA and USDA have scheduled a meeting on 07/10/18 with representatives from Animal Care and Control Agencies in San Bernardino, Los Angeles, Ventura, Riverside and Orange counties to provide information on the current efforts CDFA and USDA are implementing to control and eradicate VND in San Bernardino County and surrounding areas. The goal is to strengthen partnerships with as many agencies as possible to carry out the mission of stopping the spread of VND and eradicating this devastating disease.

Declaration

- On 06/26/18 at 1840 hours, the California State Warning Center (CSWC) received a report regarding Virulent Newcastle Disease (VND) from the California Department of Food and Agriculture (CDFA). CDFA has declared an Agricultural Emergency to provide the department the authority to activate internal emergency provisions and to expedite the request for permits and waivers required to perform designated activities under an emergency basis.

Activations

- San Bernardino Operational Area (OA) EOC is activated to Level 3 (lowest level) and will continue to monitor the incident.

Deployments

- One (1) Cal OES Southern Region Senior Emergency Services Coordinator (ESC) is deployed to the ICP as an AREP (Agency Representative). Operational Period of 0700-1900 hours.

WEATHER OF CONCERN

Weather of Concern

Northern California:

- Critical fire weather conditions exist from this afternoon through this evening for far northeastern California (Modoc County)
- Gusty winds combined with very low relative humidity could allow new or existing fires to spread rapidly across portions of northern California this afternoon and evening.
 - The area most likely to exceed critical fire weather thresholds is in Modoc County where west to southwest winds will peak around 20-25 mph with relative humidity down near or even below 10 percent.

Southern California:

- Critical Fire Weather and Excessive Heat conditions continue across Southern California today due to forecast excessive heat, gusty winds, low humidity, and possible thunderstorms.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

*** High Risk for gusty SW afternoon winds/Low Relative Humidity (RH) Far Eastside Today through Monday ***

A low pressure trough remains just off the west coast and strong high pressure is building over the Rockies, the 4-Corners states, and into Southern CA. Over the next few days the high pressure will build into the region while the trough gradually weakens. This pattern will produce temperatures about 3-6 degrees above normal with a SW flow over the region through Monday. Areas from the Cascade-Sierra crest east will see minimum RH drop to 10-20% Saturday, and single digit readings are expected in some spots Sunday and Monday. Winds will gust to 25-35 mph in these areas each afternoon through Monday. Inland areas west of the Cascade-Sierra crest will be dry and warm, but without critical winds, while a moderately deep marine layer will keep coastal regions cool, humid and breezy.

The high pressure ridge will gradually move northward next week, increasing temperatures and decreasing winds. Tuesday will be mostly sunny, but subtropical moisture moving in from the south will cause increasing clouds and humidity each day. Isolated thunderstorms are possible in the Sierra as far north as I-80 on Wednesday, then in the northern and eastern mountains Thursday and Friday, and likely next weekend as well.

SOUTHERN CALIFORNIA

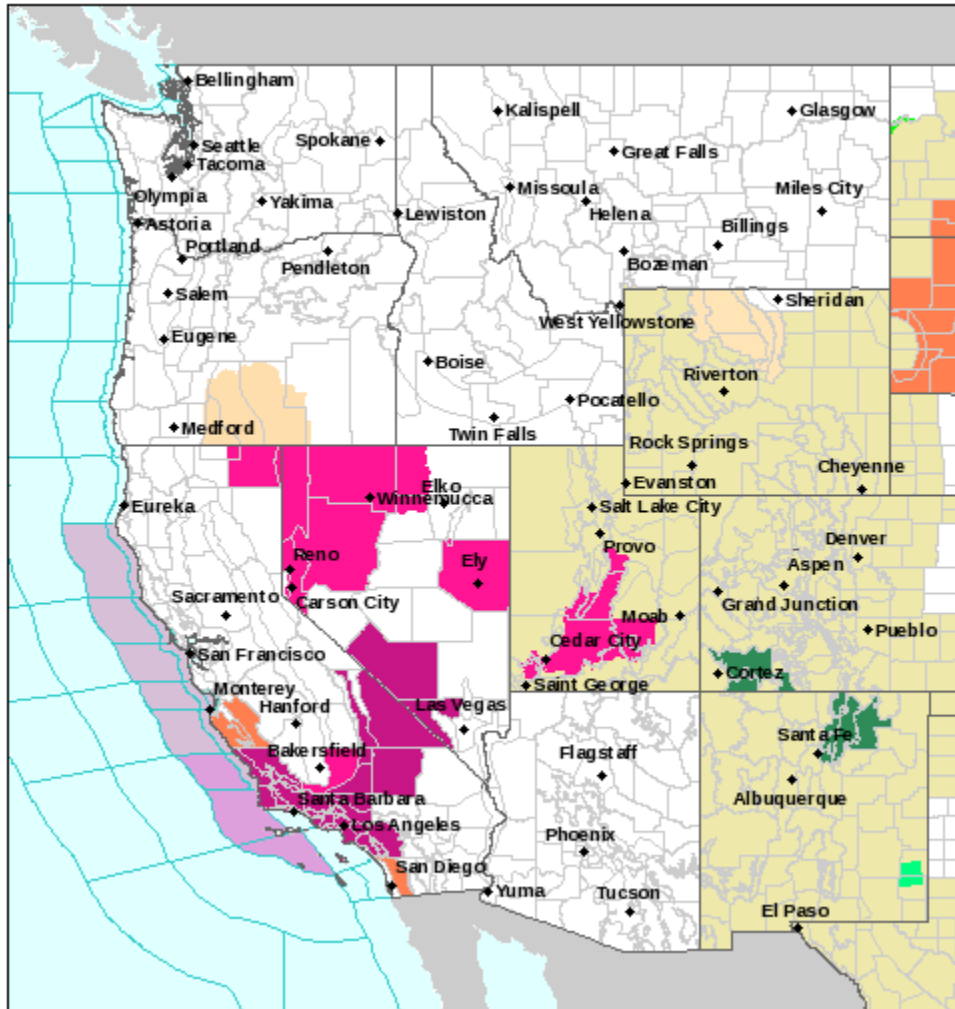

Hot and dry through Monday

Thunderstorms mainly over the mountains and deserts through the end of next week

Strong high pressure currently centered over the Four Corners Area will shift slowly off to the north and east bringing a slow cooling trend to the region through the end of next week. Maximum temperatures will be 10 to 15 degrees above normal through this weekend, with mid 80s to mid 90s across the mountains and upper 90s to 110 in the valleys. Temperatures will cool to near normal by the middle of next week. Minimum humidity will be mainly in the teens across Central California and across Southern California from Los Angeles County northward through Monday. South of Los Angeles County minimum humidity will be mainly in the 20s through Monday. Humidity will increase across the Sierra and Southern California starting Tuesday as moisture from the monsoon increases. Isolated afternoon showers and thunderstorms will form over the Southern Sierra and over the mountains and deserts of Southern California east of the Cajon Pass through Monday. Some of these thunderstorms will be on the dry side. There will be an increase in shower and thunderstorm activity across the mountains and deserts Tuesday through the end of next week. Some shower and thunderstorm activity will be possible across the coastal and valley locations of Southern California Tuesday and Wednesday. Winds will be light through the end of next week, except there will be strong and erratic winds in and near any thunderstorm that develops.
